BIOGRAPHY

Mr. Gerald Mlowe holds a BSc. Range Management from Sokoine University of Agriculture (SUA). since December, 2020. He has passion and interest in matters of animal health aspects of livestock, pet animals, poultry and wild ungulates including small stock such as rodents. Furthermore, he has sufficient hands-on experience in research and science.

Since 2018, Gerald has been involved in providing advisory and consultancy services to improve productivity of rangelands, resolve rangeland conflicts, rehabilitate degraded rangelands, monitor range health trends, pasture establishment and management for health and sustainable pastoral systems. He is also an entrepreneurs, planners, conservationists and managers of ecologically acceptable range management for economic gain.

Mr. Gerald has sufficient hands-on experience on research, he has been involved in Participatory research design preparation, dissemination and training farmers and livestock keeper on animal feeds by using of Integrated Range Management practices to improve their productivity of scarcity of forage during dry seasons in collaboration with Sustainable Agriculture Tanzania (SAT).

In terms of research, Gerald worked as team leader in number of projects including Workshop for Participatory research design (WPRD). Held by Sustainable Agriculture Tanzania (SAT) on 7th December 2019. Also, he has been working under the Africa Centre of Excellence for Innovative Rodent Pest Management and Biosensor Technology Development Project (ACE II IRPM & BTM) project at Morogoro region as an assistant research fellow.

Mr. Mlowe has experience working with National Ranching Company Ltd (NARCO) including (Kongwa and Ruvu), Tanzania Livestock Research Institute (TALIRI), Livestock Training Agency (LITA)- Mpwapwa and Zanzibar Livestock Research Institute (ZALIRI) and Department of Livestock development in Zanzibar as livestock officer providing technical advice in animal feeds.

Mr. Mlowe is a trustworthy person who can handle sensitive issues with due respect and confidentiality. He is a very resourceful person as he is professionally matured and his communication skill is good enough to conduct quit a number of projects and innovations. He has also championed the development of Double G company and He is currently a team leader of TRIFOD products. Likewise, He is currently graduated his Master's degree in Public Health Pest Management at Sokoine University of Agriculture.
