

NAME; DAUDI VINCENT MWANAMBUU

occupation student

sokoine university of agriculture

I am the BSc. Agronomy student in my final academic year at sokoine university of agriculture. specialized in soil analysis and water conservation (Agronomy) and is responsible for educating farmers on the better land use to optimize crops production.

Being expert in soil science and analysis I am oriented in using Microsoft computer applications like Excel, Microsoft word and internet programs in interpreting different soil parameters.

I have been an active member of the prominent society Tanzania Agronomy Society (TAS) for three years, Tanzania Fertilizer Regulatory Authority (TFRA) and Tanzania Official Seed Certification Institute also recognize me officially as among members who attended successful trainings.

I attended Field Practical Training (FPT) 2020 which was basically a field preparation and soil analysis-based training, currently I am carrying out the special project on the assessment of soil fertility status at SUA model farm.

Despite being student, I also engage in several practices such crops production Sumbawanga, poetry works including writing and reading
