

My name is ANDREA J MASHIKU,

Student

Sokoine university of agriculture

a Bachelor agronomy final year student at SOKOINE UNIVERSITY OF AGRICULTURE dealing with soil analysis and water conservation(agronomy) and I'm responsible for educating farmers on the better land use to optimize crop production.

Being an expert in soil science and water conservation I'm also oriented in computer skills such as Microsoft word, Microsoft excel, ppt and office in general, internet-based computer activities and others.

I have been an active member of the prominent society Tanzania agronomy society (TAS) for three years since 2018 until now, also attended various workshop trainings regarding agriculture such as TOSCI, TFRA, and Sustainable Agriculture Tanzania (SAT).

Despite of being a student, I also engage myself in other activities such as Crop cultivation at SUGECO and being an assistant researcher to MSc students from the department of engineering. I'm currently conducting a collaborative research on RELATING SOIL FERTILITY WITH FLOPPING OF CINNAMON LEAVES with farmers from KINOLE village, Morogoro under supervision of Sustainable Agriculture Tanzania.
