

**NAME; STIVIN RWEYEMAMU REMIGIUS**

**Occupation Student**

**sokoine university of agriculture**

I am a BSc. Agronomy student in my final year at sokoine university of agriculture (SUA), the degree program is hosted by the department of soil and geological science within the college of agriculture. being a student at this university,

I have been holding different positions within the university administrative system and at affiliate level respectively, I do work as a class representative for BSc Agronomy students 2018/2021, Department of soil and geological science representative in the university students representative board (USRC) also Tanzania agronomy society deputy secretary since 2020

I have been participating in different practical oriented and theoretical based learning activities within the campus and outside the campus such as Tanzania fertilizer regulatory authority(TFRA), Tanzania official seed certification institute(TOSCI) and Tanzania student's empowerment (TASE) organized workshop trainings at SUA from which I got awarded certificates of attendance .i attended field practical training 2020 at SUA and I am currently carrying out a research project on N,P,K & S fertility status and the effect of their application in the soil at SUA farms

Currently I am a member of Tanzania agronomy students (TAS), SUASO-USRC board, class representatives board as well as the united nations youth association (YUNA) from which I do keep on learning and exposure to the available opportunities

Apart from that, I have basic computer skills mastering in Microsoft office word, excel as well as other computer skills such as maintenance and graphics designing, internet exploration skills, in addition I engage my self in small scale agriculture in tanga, bukoba as the part of my career
